A.Statement (1) ALONE is sufficient, but statement (2) alone is not sufficient. B.Statement (2) ALONE is sufficient, but statement (1) alone is not sufficient.
C.BOTH statements TOGETHER are sufficient, but NEITHER statement ALONE is sufficient. D.EACH statement ALONE is sufficient

Hence, (1) alone is sufficient.Since 1 + 0 = 1, 1 - 0 = 1, 1 × 0 = 0, and 1 ÷ 0 is undefined, it follows from (2) that ? could represent either addition or subtraction, so that 3 ? 2 could equal 5 or 1. An hour will be spent in writing a postcard , another hunting for spectacles, half an hour to search for the address ,an hour and a quarter in composition and twenty minutes in deciding whether or not to take an umbrella when going to the pillar box in the street. The total effort that could occupy a busy man for three minutes, all told may in this fashion leave another person completely exhausted after a day of doubt ,anxiety and toil. Accidents on roads can be prevented, provided the quality of roads is improved and the drivers are instructed in safety rules which they must follow for their own protection. It is also necessary that the illumination on the roads is adequate so as to prevent accidents at night. The surprisingly abundant life of the Indian Ocean is confined to the upper layers; the deeper and especially the bottom waters are devoid of oxygen and are often permeated with hydrogen sulphide. It is not luck but labour that makes man. Luck, says an American Writer, is ever waiting for something to turn up; labour with keen eyes and strong will always turns up something. Luck lies in bed and wishes the postman would bring him news of legacy ; labour turns out at six and with busy pen ringing hammer lays the foundation of competence . Luck whines, labour watches. Luck slips downwards to self-indulgence; labour strides upwards and aspires to independence. The conviction therefore, is extending that diligence is the mother of good luck.
