(after Indian Railways, Indian Army and India Post).

TCS Technical round

- There are two components of technical questions. MCQ's and Programming.
- MCQ (or) Fill in the blanks – 20 Minutes

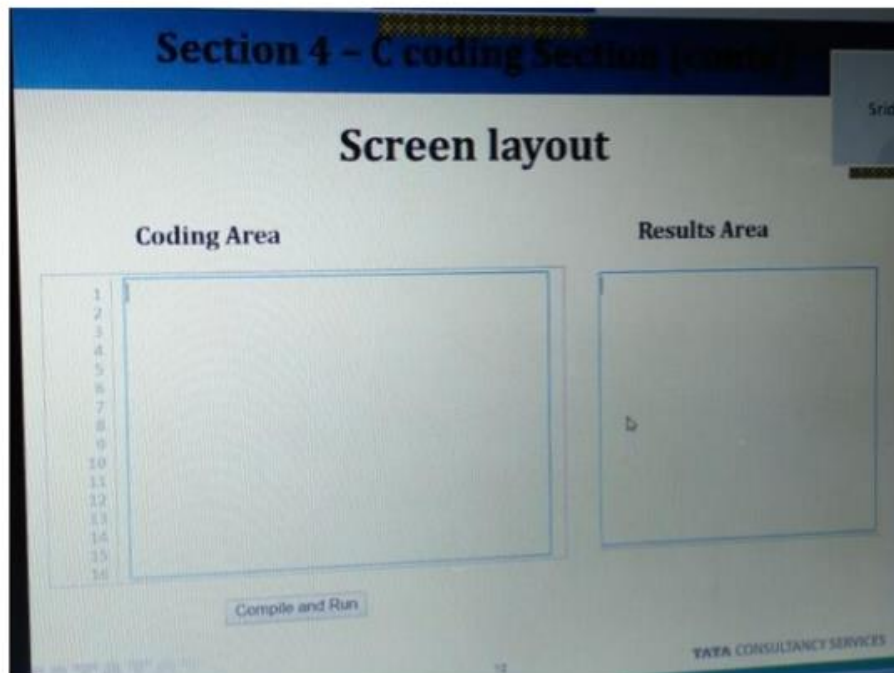

– 10 Questions

- Coding round – 20 Minutes

– One C program

Coding platform

Coding platform - Instructions

- There was **only one question**.
- It has **10 attempts**(We can compile only **10 times**).
- We must **start our code from the scratch**.

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

- The coding platform is divided into two, one for writing the code and other for output. We **should write the whole program**.
- We **can't use any input functions like scanf(), getch(), getchar()**.
- The input to be provided should be read as **command line arguments**.

Coding platform - Instructions

- We must **only print exact output**.
- Output must not be re-framed by extra words.
- If there is any error, the error will be shown in the output dialog box.
- The errors are clearly mentioned.
- If there are no errors, a message like "compiled successfully"

will be printed.

- Along with that they will mention **four test cases** are '**passed**' or '**failed**'. They are indicated like private and public test cases. They have not mentioned what is the test case, which is difficult to understand.
- There is **no time limit**. But, when all the 10 attempts are over, a message like "attempts exhausted" will be shown.
- To compile and run there is a button provided. To run the code, just click on that.

1) How many times the below loop will be executed?

```
#include<stdio.h> int main() {  
int x, y; for(x=5;x>=1;x--) {  
for(y=1;y<=x;y++) printf("%d\n",y);  
} }
```

Join Telegram Group: <https://t.me/myPlacementPrep>

Options

1. 15
2. 11
3. 10
4. 13

2) Where the local variables are stored?

A. Disk B. Stack C. Heap D. 13

3) Select the missing statement?

```
#include<stdio.h> long int fact(int n); int main()  
{  
  \\missing statement }
```

```
long int fact(int n) {
```

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

```
if(n>=1)
return n*fact(n-1);

else
return 1;

}
```

Options

1. `printf("%ll\n",fact(5));`
2. `printf("%u\n",fact(5));`
3. `printf("%d\n",fact(5));`
4. `printf("%ld\n",fact(5));`

4) Which of the following indicate the end of the file?

- A. Feof()
- B. EOF
- C. Both feof() and EOF
- D. None of the mentioned

5) If a function's return type is not explicitly defined then it's default to _____ (In C).

- A. int
B. float C. void D. Error

6) For passing command line argument the main function should be like _____

1. int main(char *argv[], int argc)
2. int main(int argc)
3. int main(char *argv[])
4. int main(int argc, char *argv[])

7) How many times the below loop will be executed?

```
#include<stdio.h> int main()  
{  
int i; for(i=0;i<5;i++) {  
printf("Hello\n"); }  
}
```

Options

1. 5
2. 1
3. 0
4. 3

8) Which of the following is a User-defined data type?

- A. long int
- B. double
- C. unsigned long int D. enum

9) Which has the highest precision?

- A. float
- B. double
- C. unsigned long int D. Long int

Floating point types

The following table provide the details of standard floating-point types with storage sizes and value ranges and their precision –

Type	Storage size	Value range	Precision
float	4 byte	1.2E-38 to 3.4E+38	6 decimal places

double	8 byte	2.3E-308 to 1.7E+308	15 decimal places
long double	10 byte	3.4E-4932 to 1.1E+4932	19 decimal places

10) What will be the output/error?(for input: 6, 9

```
#include<stdio.h> int fg(int,int);
int main()
{
int n1,n2,g;
scanf("%d%d", &n1,&n2);
g=fg(n1,n2);
printf("%d",g); }
int fg(int x,int y)
{
while(x!=y) {
```

```
if(x>y)
return fg(x-y,y);

else
return fg(x,y-x);
}

return x; }
```

Options

1. 3
2. 6
3. 9
4. Error

Tips to Crack Test

- . Never guess an answer
- . Attend only the questions you are reasonably certain of

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

visit: www.MyPlacementPrep.com

answering correctly

- If you don't get the answer in the first try then skip the question
- Read the question fully once and find out what they are asking
- Try not to panic at the sight of those long programming questions.
- Most programming questions are very simple which require you to do some **logical thinking** with a **clear mind**.
