AMCAT (core @ www.sarthaks.com) Aspiring Minds Computer Adaptive Test Practice Bits / Previous MCQ

Ques 1 : Choose the correct answer.

If the sum of two numbers is 55 and the H.C.F. and L.C.M of these numbers are 5 and 120 respectively, then the sum of the reciprocals of the numbers is equal to:

Option 1 : 55/601 Option 2 : 601/55 Option 3 : 11/120 Option 4 : 120/11 Ques 2 : Choose the correct answer.

Three different containers contain 496 litres, 403 litres and 713 litres of mixtures of milk and water respectively. What biggest measure can measure all the different quantities exactly ?

Option 1 : 1 litre Option 2 : 7 litre Option 3 : 31 litre Option 4 : 41 litre Ques 3 : Choose the correct answer.

Six bells commence tolling together and toll at intervals of 2, 4, 6, 8, 10 and 12 seconds respectively. In 30 minutes, how many times do they toll together ?

Option 1 : 4 Option 2 : 10 Option 3 : 15 Option 4 : 16 Ques 4 : Choose the correct answer.

Four different electronic devices make a beep after every 30 minutes, 1 hour, 3/2 hour and 1 hour 45 minutes respectively. All the devices beeped together at 12 noon. They will again beep together at:

The number of prime factors of $(3 \times 5)^{12} (2 \times 7)^{10} (10)^{25}$ is:

Option 1 : 47 Option 2 : 60 Option 3 : 72

Ques 6 : Choose the correct answer.

Ques 13 : Given signs signify something and on that basis, assume the given statements to be true and find which of the two conclusions I and II is/are definitely true.

$P + Q$ means P is greater than Q

$P * Q$ means P is greater than or equal than Q

$P = Q$ means P is equal to Q

P / Q means P is less than Q

$P - Q$ means P is less than or equal to Q

Statements

$X/Y, W * Z, Z + Y$ **Conclusions**

I. $W + Y$

II. X/Z

Option 1 : Only conclusion I is true

Option 2 : Only conclusion II is true

Option 3 : Neither conclusion I nor II is true

Option 4 : Both conclusion I and II are true

Ques 152 : The question is followed by two arguments numbered I and II. You have to decide which of the arguments is a strong argument and which is a weak argument.

Should the retirement age of all government employees in India be made 55 years ?

Arguments:

I. Yes, this will help government to offer employment to youth at lower cost and with higher productivity.

II. No, the Government will be deprived of the expertise of the experienced employees and this will have adverse effect on productivity.

Option 1 : Only argument I is strong.

Option 2 : Only argument II is strong.

Option 3 : Either I or II is strong.

Option 4 : Option 5 : Both I

Neither I nor II is strong.

and II are strong.

Neither I nor II is strong.

and II are strong.

Ques 153 : The question is followed by two arguments numbered I and II. You have to decide which of the arguments is a strong argument and which is a weak argument.

Should the public sector undertakings be allowed to adopt hire and fire policy?

Arguments:

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

I. Yes, this will help the public sector undertakings to get rid of non-performing employees and will also help to reward the performing employees.

II. No, the management may not be able to implement the policy in an unbiased manner and the employees will suffer due to the high-handedness of the management.

Option 5 : Both I and II are strong.

Ques 154 : The question is followed by two arguments numbered I and II. You have to decide which of the arguments is a strong argument and which is a weak argument.

Should the admission to professional courses in India be given only on merit without any concession to any particular group of students?

Arguments:

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

I. Yes, this will improve the quality of the professionals as they will be able to complete the courses successfully.

II. No, this will keep large number of socially and economically backward students out of the reach of the professional courses.

Option 1 : Only argument I is strong.

Option 2 : Only argument II is strong.

Option 3 : Either I or II is strong.

Option 4 : Option 5 : Both I

Neither I nor II is strong.

and II are strong.

Ques 155 : Question is followed by four arguments numbered I, II, III and IV. You have to decide which of the arguments are 'strong' arguments and which are 'weak' arguments.

Should all the management institutes in the country be brought under government control?

Arguments:

I. No, the government does not have adequate resources to run such institutes effectively.

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

II. No, each institute should be given freedom to function on its own

III. Yes, this will enable to have standardized education for all the students. IV. Yes, only then the quality of education would improve.

Option 1 : None of the statements is strong.

Option 2 : Only III is strong.

Option 3 : Only I ,II and III are strong.

Option 4 : Only I and III are strong

Option 5 : All the statements are strong.

Ques 156 : The questions is followed by two arguments numbered 'X' and 'Y'. You have to decide which of the argument(s) is forceful and to what degree.

Should trade unions be banned ?

Arguments:

X. Yes, as they create a lot of problem for industrialists.

Y. No, as they take care of the rights of the labour working in the industries.

Option 1 : Argument 'X' is forceful

Option 2 : Argument 'Y' is forceful.

v

Ques 1 : Choose the correct answer

There is a new data-type which can take as values natural numbers between (and including) 0 and 25. How many minimum bits are required to store this data-type.

Option 1 : 4 Option 2 : 5 Option 3 : 1 Option 4 : 3 Ques 2 : Choose the correct answer

A data type is stored as an 6 bit signed integer. Which of the following cannot be represented by this data type?

Option 1 : -12 Option 2 : 0 Option 3 : 32 Option 4 : 18 Ques 3 : Choose the correct answer

A language has 28 different letters in total. Each word in the language is composed of maximum 7 letters. You want to create a data-type to store a word of this language. You

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

500+ Free Mock Test visit: www.MyPlacementPrep.com

decide to store the word as an array of letters. How many bits will you assign to the data-type to be able to store all kinds of words of the language.

Option 1 : 7 Option 2 : 35 Option 3 : 28 Ques 4 : Choose the correct answer

A 10-bit unsigned integer has the following range:

Option 1 : 0 to 1000 Option 2 : 0 to 1024 Option 3 : 1 to 1025

Ques 5 : Choose the correct answer

500+ Free Mock Test visit: www.MyPlacementPrep.com

Option 4 : 196

Option 4 : 0 to 1023

Rajni wants to create a data-type for the number of books in her book case. Her shelf can accommodate a maximum of 75 books. She allocates 7 bits to the data-type. Later another shelf is added to her book-case. She realizes that she can still use the same data-type for storing the number of books in her book-case. What is the maximum possible capacity of her new added shelf?

Option 1 : 52 Option 2 : 127 Option 3 : 53 Option 4 : 75 Ques 6 : Choose the correct answer

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

500+ Free Mock Test visit: www.MyPlacementPrep.com

A new language has 15 possible letters, 8 different kinds of punctuation marks and a blank character. Rahul wants to create two data types, first one which could store the letters of the language and a second one which could store any character in the language. The number of bits required to store these two data-types will respectively be:

Option 1 : 3 and 4 Option 2 : 4 and 3 Option 3 : 4 and 5 Option 4 : 3 and 5 Ques 7 : Choose the correct answer

Parul takes as input two numbers: a and b. a and b can take integer values between 0 and 255. She stores a, b and c as 1-byte data type. She writes the following code statement to process a and b and put the result in c.

c = a + 2*b

function calculate()?

Option 1 : 11 -5 Option 2 : 10 -5 Option 3 : 6 -5 Option 4 : 5 -5 Ques 78 : Choose the correct answer

Consider the following code:

```
function modify(b,a) {
```

```
return a - b }
```

```
function calculate() {
```

```
integer a = 5, b = 12, c
```

```
c = modify(a, b);
```

```
print c }
```

Assume that a and b were passed by reference. What will be the output of the program on executing function calculate() ?

Option 1 : 7 Option 2 : -7 Option 3 : Error Option 4 : 8 Ques 79 : Choose the correct answer

Consider the following code:

```
function modify(y,z) {
```

```
y= y + 1 z= z+ 1 return y - z
```

```
}
```

```
function calculate() {
```

```
integer a = 12, b = 20, c
```

Afzal writes a piece of code, where a set of three lines occur around 10 times in different parts of the program. What programming concept can he use to shorten his program code length?

Option 1 : Use for Option 2 : Use Option 3 : Use Option 4 : Use loops functions arrays classes

Ques 81 : Choose the correct answer

Geetika writes a piece of code, where a set of eight lines occur around 10 times in different parts of the program (Code A). She passes on the code to Deva. Deva puts the set of eight lines in a function definition and calls them at the 10 points in the program (Code B). Which code will run faster using an interpreter?

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

Option 1 : Code A Option 2 : Code B

Ques 82 : Choose the correct answer

Consider the following code:

```
function modify(a,b) {  
    integer c, d = 2 c = a*d + b return c  
}  
  
function calculate( ) {  
    integer a = 5, b = 20, c integer d = 10  
    c = modify(a, b);  
    c= c+ d  
    print c }
```

Option 3 : Code A and Code B will run with the same speed

Option 4 : None of these

Ques 123 : Choose the correct answer

Option 4 : $O(n \log_2 n)$

The time required to insert an element in a stack with linked list implementation is

Option 1 : $O(1)$ Option 2 : $O(\log_2 n)$ Option 3 : $O(n)$ Ques 124 : Choose the correct answer

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

Option 4 : $O(n \log_2 n)$

In the following sorting procedures, which one will be the slowest for any given array?

Option 1 : Quick sort Option 2 : Heap sort Option 3 : Merge Sort Option 4 : Bubble Sort

Ques 125 : Choose the correct answer

Pankaj stores n data elements in a hash table. He is able to get the best efficiency achievable by a hash table. What is the time complexity of accessing any element from this hash table?

Option 1 : $O(1)$ Option 2 : $O(n^2)$ Option 3 : $O(\log n)$ Option 4 : $O(n)$ Ques 126 : Choose the correct answer

Every element of a data structure has an address and a key associated with it. A search mechanism deals with two or more values assigned to the same address by using the key. What is this search mechanism?

Option 1 : Linear Search Option 2 : Binary Search Option 3 : Hash Table Option 4 : None of these

Ques 127 : Choose the correct answer

AMCAT (core @ www.sarthaks.com) Aspiring Minds Computer Adaptive Test Practice Bits / Previous MCQ

The order of magnitude of the worst case performance of a hash coded search (over N elements) is

Option 1 : N Option 2 : $N \log_2 N$ Option 3 : $\log_2 N$ Ques 128 : Choose the correct answer

Option 4 : not dependent upon N

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

A sorting algorithm traverses through a list, comparing adjacent elements and switching them under certain conditions. What is this sorting algorithm called?

Option 1 : insertion Option 2 : heap sort Option 3 : quick Option 4 : bubble sort sort sort

Ques 129 : Choose the correct answer

A sorting algorithm iteratively traverses through a list to exchange the first element with any element less than it. It then repeats with a new first element. What is this sorting algorithm called?

Option 1 : insertion Option 2 : selection Option 3 : heap sort Option 4 : quick sort sort sort

Ques 130 : Choose the correct answer

A sort which uses the binary tree concept such that any number in the tree is larger than all the numbers in the subtree below it is called

Option 1 : selection Option 2 : insertion Option 3 : heap sort Option 4 : quick sort sort sort

Ques 131 : Choose the correct answer

The average time required to perform a successful sequential search for an element in an array $A(1 : n)$ is given by

Ques 158 : Choose the correct answer

An array contains the following elements in order: 7 6 12 30 18. Insertion sort is used to sort the array in ascending order. How many times will an insertion be made?

Option 1 : 2 Option 2 : 3 Option 3 : 4 Option 4 : 5 Ques 159 : Choose the correct answer

An array of 5 numbers has the following entries in order: 7 4 5 10 8. Prashant uses selection sort to sort this array in descending order. What will the array contain after two iterations of selection sort?

Option 1 : 10 8 7 5 4 Option 2 : 10 8 5 7 4 Option 3 : 8 10 5 7 Option 4 : None of these

Ques 160 : Choose the correct answer

Srishti writes a program to find an element in the array A[5] with the following elements in order: 8 30 40 45 70. She runs the program to find a number X. X is found in the first iteration of binary search. What is the value of X?

Option 1 : 40 Option 2 : 8 Option 3 : 70 Option 4 : 30 Ques 161 : Choose the correct answer

The array A has n elements. We want to determine the position of X in the array. We know that X is present in the array A and X can be present at any location in the array with equal probability. How many comparisons will be required on average to find the element X using linear search?

Option 1 : n Option 2 : $(n+1)/2$ Option 3 : $2*n$ Option 4 : n^2 Ques 162 : Choose the correct answer

**A is an empty stack. The following operations are done on it. PUSH(1)
PUSH(2)
POP**

**PUSH(5)
PUSH(6)
POP**

What will the stack contain after these operations. (Top of the stack is underlined)

Option 1 : 5 6 Option 2 : 1 5 Option 3 : 5 6 Option 4 : 1 5 Ques 163 : Choose the correct answer

**A stack is implemented as a linear array A[0...N-1]. Farhan writes the following functions for pushing an element E in to the stack.
function PUSH(top, E, N)**

A queue is implemented as a (singly linked) linked-list for easy addition and deletion of elements. Each node has an element and pointer to another node. Which node will point to empty/no location?

Option 1 : Front Option 2 : Rear Option 3 : Both Ques 167 : Choose the correct answer

Option 4 : None of these

A stack is implemented as a (singly-linked) linked-list, where each node contains data and address of another node. The top node will contain the address of which node?

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

Option 1 : No node. It will be empty

Option 2 : The node containing the first element pushed into the stack.

Option 3 : The
node containing the
pushed just before
the top element.

Option 4 : None of element which was these

Ques 168 : Choose the correct answer

Join Telegram Channel: <https://t.me/MyPlacementprepApp>

Join Telegram Group: <https://t.me/myPlacementPrep>

A queue is implemented by a linear array of size 10 (and not as a circularly connected array). Front and Rear are represented as an index in the array. To add an element, the rear index is incremented and the element is added. To delete an element, the front index is incremented. The following operations are done on an empty queue.

ADD 1; DELETE; ADD 2; ADD 3; ADD 4; DELETE, DELETE

After this set of operations, what is the maximum capacity of the queue?

Option 1 : 6 Option 2 : 7 Option 3 : 10 Ques 169 : Choose the correct answer

Option 4 : None of these

A queue is implemented as a (singly linked) linked-list. Each node has an element and pointer to another node. *Rear* and *Front* contain the addresses of the rear and front node respectively. If the condition (rear is equal front) is true and neither is NULL, what do we infer about the linked list?

Option 1 : It has no element Option 2 : It has one element Option 3 : There is an error Option 4 : None of these

Ques 170 : Choose the correct answer

Jaswinder has a book of tickets and wants to store ticket numbers in a data structure. New tickets are added to the end of the booklet. Ticket at the top of the stack is issued to the customer. Which data structure should Jaswinder use to represent the ticket booklet?

Option 1 : Queue Option 2 : Stack Option 3 : Array Option 4 : Graph
