ZOHO Placement Paper

Directions for questions 1-5: Answer the questions on the basis of transformations made on the given matrix.

Condition A: The transformations are made individually. For example transformation

2 will not be made on result on transformation

1	

	COLUMN 1	COLUMN 2	COLUMN 3	COLUMN 4
ROW 1	1	1	1	1
ROW 2	2	4	8	16
ROW 3	3	9	27	81
ROW 4	4	16	64	256

Transformation 1: Column 2 is interchanged with column 4 and then row 3 is interchanged with Row 4.

Transformation 2: Row 2 is interchanged with Row 1 and then Column 4 elements are copied as Row 4.

Transformation 3: Column 4 elements are copied as Column 2 elements and then Row 3 is interchanged with Row 1.

- 1. After transformation 1 what will be the element in Row 2 and Column 1?
- a) 64
- b) 2
- c) 8
- d) none of these
- . After transformation 3 what will be the elements of column 1?
- a) 3,2,1,4

- 3. After transformation 2 what will be the element in Row 4 and Column 4?
- a) 1 b)
- b) 16
- c) 81
- d) 256
- . After transformation 3 what will be the element in Row 3 and Column 1?
- a) 1
- b) 16
- c) 81
- d) 256

5 If transformation 1 is performed after performing transformation 3 i.e. 1 is

- . performed on the resultant matrix of 3, then what will be the elements of Row 4?
- a) 4,64,4,256b) 1,2,1,2 c) 4,256,64,256 d) none of these
